RE: Review of Site 27/55/9/16 Motor T Building Construction Activities  
Parris Island  
SC6 170 022 762

Dear Mr. Cook and Ms. Donohoe:

The Division of Waste Management of the South Carolina Department of Health and Environmental Control (Department) completed the review of *Site 27/55/9/16 Motor T Building Construction Activities* received May 7, 2012 along with USEPA's response letter dated June 8, 2012. The Department shares the same concerns as USEPA in regards to the contaminated environmental media. If trenching is completed as described and if groundwater is encountered, the work plan (for management of the impacted media) and/ or FS Report should include a discussion of the affect on current site conditions (i.e. contaminated groundwater flow, etc). Additionally the Department feels that the location of light poles would be better elsewhere. However, if the Navy chooses to install the light poles within the contaminated area, a work plan for the placement of the light poles should also include a discussion of how the construction may impact current site conditions (i.e. contaminated groundwater flow, etc).

The Department's review is based on the information presented by MCRD to date; any information found to be contradictory may require further action. If you have any questions regarding this issue, please contact me at (803) 896-4218.

Sincerely,

A handwritten signature in black ink, appearing to read 'Meredith Amick', with a long horizontal flourish extending to the right.

Meredith Amick, P.E., Environmental Engineer  
Corrective Action Engineering Section  
Division of Waste Management
